# INSIDE SCOOP

The latest news and fantastic facts from around the globe...

I'M PURR-ECTLY COMFY, THANKS!

## KITTY CUP!

A silly study claiming that cats are both solid and liquid has won a 2017 Ig Nobel Prize – an award given to scientific research that make you laugh and think! It argues that, like fluids, moggies can adopt the shape of the containers they lie in (above). Other winners include a study about why old men have big ears, and the discovery that didgeridoo playing reduces snoring!

# MISSION ISOLATION!

NASA hopes to send humans to Mars within the next 20 years, but they first need to test how well future space-explorers will cope with being cooped up together 24/7, 54.6 million km away from Earth. So, six volunteer scientists spent eight months living in a specially-designed dome on a volcano in Hawaii! The crew's communications with the outside world were delayed by 20 minutes to mimic the reception between Earth and Mars. And the environment was chosen to mirror the Red Planet's rocky plant-free surface. Volunteers were only allowed to leave the dome once a week (whilst wearing space suits), had limited water supplies and mainly ate freeze-dried food! Could YOU live in a house like this?

A real Mars mission may last up to three years!

The dome was about the size of a small house!

Hawaii's volcanic landscape looks a lot like Mars!

# STUNNING SNAPS

Check out some of the finalists in this year's Wildlife Photographer of the Year competition! Judges have been poring over a whopping 50,000 entries from 92 different countries and the final winner will be chosen on 17 October! Our favourite photo is Sewage Surfer by Justin Hofman (right), which was taken off the coast of Sumbawa Island in Indonesia. Seahorses ride currents by grabbing hold of floating objects, such as seaweed. But in Justin's startling image, the tiny 3.8-cm-long creature has grabbed hold of a discarded plastic cotton bud. Indonesia is the world's second biggest contributor of ocean plastic waste, so the photo is a sad reminder of the problem. \* The Wildlife Photographer of the Year exhibition opens on 20 October at London's Natural History Museum, before going on a nationwide tour. Cool!

A tiny estuary seahorse glides gracefully through the polluted ocean

## DEMOCRATIC DOGS!

It turns out that humans aren't the only animals that vote. African wild dogs do it too – by sneezing! Zoologists working at the Botswana Predator Conservation Trust have found that when these endangered dogs gather for greeting ceremonies called social rallies, they use sneezes to decide when to all go hunting. The more sneezes there are, the more likely it is that the pack moves off to hunt. Wow! Just don't expect to see these pooches at a polling station any time soon...

All those in favour, say "Achoo!"

# 3 FAST FACTS

## Remembrance Day

On 11 November, people across the country remember those who lost their lives in wars...

- 1 Sadly, nearly 17 million people died as a result of the First World War. The last surviving veteran, Harry Patch, passed away on 25 July 2009 (aged 111). He was lovingly known as the Last Fighting Tommy.
- 2 The war ended on the 11th hour of the 11th month of the 11th year in 1918. A year later, King George V announced that those who died would be honoured with a two-minute silence every year at 11am on 11 November.
- 3 Around this time of year, people wear paper poppies as a way to raise money for war veterans and remember those who died. It's said poppies were the first flowers to bloom on battlefields after the war.

Remembrance Sunday takes place this year on 12 November. The Queen will lay a poppy wreath at the Cenotaph war memorial in London.

## CRAZY EVENT

5 NOVEMBER

## BONFIRE NIGHT

Lots of people love this night of fireworks, treacle toffee and, of course, bonfires! But do you know why we 'Remember, remember the 5th of November'? Well, it's the anniversary of the Gunpowder Plot, a failed attempt to blow up Parliament in 1605. Back then, England was ruled by King James I, who followed the Protestant form of Christianity. Angry with the way he was treating Catholics, a group of men – including Guy Fawkes – hatched a plot to destroy the Houses of Parliament, with the King inside! But before the attack could happen, Guy Fawkes was caught red-handed – along with fuses, matches and 36 barrels of gunpowder. Oops! Since then, people have made bonfires on which they burn the 'Guy' – a dummy made to represent Mr. Fawkes. The event is also known as Guy Fawkes Night!

# MAKE IT A DATE

What's going on this month?

10 November

**WORLD SCIENCE DAY**  
Celebrate how science can lead to peace!

13 November

**WORLD KINDNESS DAY**  
Do something nice for a stranger today!

20 November

**UNIVERSAL CHILDREN'S DAY**  
It's your day, gang. Yay!

20-26 November

Take part at [roadsafetyweek.org.uk](http://roadsafetyweek.org.uk)

30 November

**ST. ANDREW'S DAY**  
It's Scotland's national day!

# Wacky WORLD!

Check out the planet's strangest pictures...

## Paper puck!

CANADA

Have you ever tried origami? Well, this amazing ice hockey scene, on display at the Canadian National Exhibition in Toronto, is an incredible example of the art. Sheets of paper were folded into the cool figures without any cutting or glueing. Amazing eh?!

GERMANY

## Sand-sational!

Summer may be over, but we still love a good sandcastle, whatever the weather. So check this beauty out! The record-breaking Sandburg sandcastle, built in Duisburg, Germany, was sculpted out of 3,500 tonnes of sand and stands 16.68m high – the tallest in the world. Wow!

## Sweet stop

Inspired by the famous pumpkin carriage in Cinderella, a team of artists have created 14 different fruit-shaped bus stops in Konagai, Japan. The juicy shelters look so good we might actually be tempted to miss the bus!

JAPAN

## GRAVY GRAPPLE

These mucky folk were snapped at the recent World Gravy Wrestling Championships in Bacup, Lancashire. Wonder which of them got licked?!

## EYE CONDITIONERS!

This bizarre building in Chongqing, China, looks like it's watching you. But the 'eyes' are just air-conditioning units underneath balconies. Cool!

## PARTY TRUCK!

Look at this lorry! Like a disco on wheels, the Japanese 'dekotora' truck is decorated with lights and even chandeliers. Top customisation!

## Space is the place!

 This incredible image shows the swirling dust and gas clouds in a region of space called the Rho Ophiuchi cloud complex, where new stars are forming. Rho Oph is a whopping 460 light years from Earth – to put that into perspective, one light year is about 9.5 trillion km. The mind boggles!

Using a camera connected to a telescope, Russian photographer Artem Mironov spent three nights taking this amazing picture from a farm in Namibia, southern Africa – and it scooped him first prize in this year's Insight Astronomy Photographer of the Year competition.

"It's a popular part of the sky for astro-photographers," says judge Dr. Marek Kukula, "but this image shows it in a fresh light. There's a sense of mystery in the churning clouds of gas and dust which reminds us that there's still so much to discover out there. It's a dazzling corner of our galaxy captured perfectly."

● Artem's photo and the other category winners and runners-up are on display at the Royal Observatory Greenwich's Astronomy Centre right now!

# CULTURE VULTURES!

This month's top Blu-rays, DVDs, movies, events and books!

Can Diana's superpowers help her save the day?!

Here comes Wonder Woman!

## BLU-RAY

### Wonder Woman

★ Diana is princess of the Amazons, a group of female warriors who live on a remote island paradise. But her peaceful life is turned upside down when an American pilot crash lands on the island and tells her about a raging war shaking the outside world. Sworn to protect the planet, Diana leaves her home to fight in these deadly battles. But will her superpowers be enough to bring an end to the catastrophic conflict? We hope so!

● Out now on Blu-ray, digital download and DVD. Cert 12

#### WIN!

Five readers will bag Wonder Woman on Blu-ray!

Q Which of these countries does the Amazon river NOT run through?  
 a) Brazil  
 b) Colombia  
 c) Mexico

© 2017 Warner Bros. Ent. All rights reserved. TM & © DC Comics

## MOVIE

### Earth: One Amazing Day

★ Calling all young naturalists! This breathtaking film follows the fascinating lives of different species over the course of one day. Get up-close and personal to some truly incredible creatures – including a baby zebra desperate to cross a dangerous river, a penguin who must face a death-defying journey to feed his family, and a sloth on the hunt for love. Aww! If you love wildlife, *Earth: One Amazing Day* is an absolute must-see!

● Out 20 October. Cert U

Come face to face with penguins...

... and pandas!

### National Pet Show

## EVENT

★ Give it up for our pet pals! Taking place at the NEC Birmingham, the National Pet Show is back with hundreds of awesome animals, talks from animal experts, hands-on activities and exciting celebrity guests. Yay! This year's event also features Noel's Ark, where kids can learn how to care for all kinds of creatures, from hens and owls to reptiles and mini beasts! You'll have heaps of fun!

● The National Pet Show take place 4-5 November. For more info and tickets, head to the nationalpetshow.com

What's your favourite pet?!

#### WIN!

We have three family tickets to the National Pet Show up for grabs!

Q Which of these is a breed of dog?  
 a) German farmer b) German shepherd  
 c) German chef

## READER OFFER

Use the code NATGE020 to get 20% off tickets to The National Pet Show!

Get ready for the purr-fect day out!

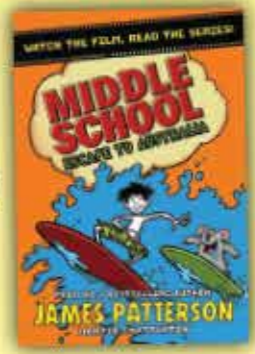

## YOUR BOOK REVIEWS!

NG KIDS readers get to grips with more radical reads...

### Middle School - Escape to Australia

James Patterson  
 ★ This slapstick comedy story is all about a boy called Rafe Khatchadorian who wins an art competition. The prize is a holiday to Australia, where he has three weeks of whirlwind adventures!

My favourite characters were The Outsiders,

Oscar Smith, 9

a group of friends Rafe meets at the beach. Although they're not the coolest kids in town they help Rafe with all his plans – I liked them so much! I enjoyed the story's illustrations because they really added to the picture in my head. The book gets ten out of ten from me!

### Clover Moon

Jacqueline Wilson  
 ★ Clover Moon lives in Cripps Alley, a backstreet in Victorian London, with her six younger siblings. Her favourite is Megs – her only blood sister. Clover's best friend and teacher is Mr Dolly, the owner of the local shop Dolls Aplenty. After a wretched case of scarlet fever breaks out, Clover loses the most important thing in her life, and she runs away in hope to find a better future for herself.

I think you should read this book if you are interested in the Victorian era or if you like books about adventures. If you enjoyed the Hetty Feather books, you'll like this!

Sheen Philip, 9

## FAB FACT BOOKS

### Cool Coding

★ Learn to 'speak computer' with this amazing introduction to the world of code, the special instructions that tell computers how to play games, make music, create images and more!

Coding is like a cool, creative puzzle that lets you programme apps and websites! Jump in, find out about the history of computers, and learn to create your own code. Brilliant!

### Good Night Stories for Rebel Girls

★ Forget flaky fairytale princesses – this awesome book is crammed with the inspiring tales of 100 real-life heroic women! From athletes, writers and aviators to politicians, pirates and palaeontologists, you'll meet extraordinary females from around the world, each illustrated with a full-page portrait.

#### WIN!

Five readers will scoop copies of all four of these books!

Q Which of these amazing women is known as the world's first computer programmer?  
 a) Ada Lovelace b) Amelia Earhart c) Michelle Obama

Flick to page 55 to enter any of these cool competitions!

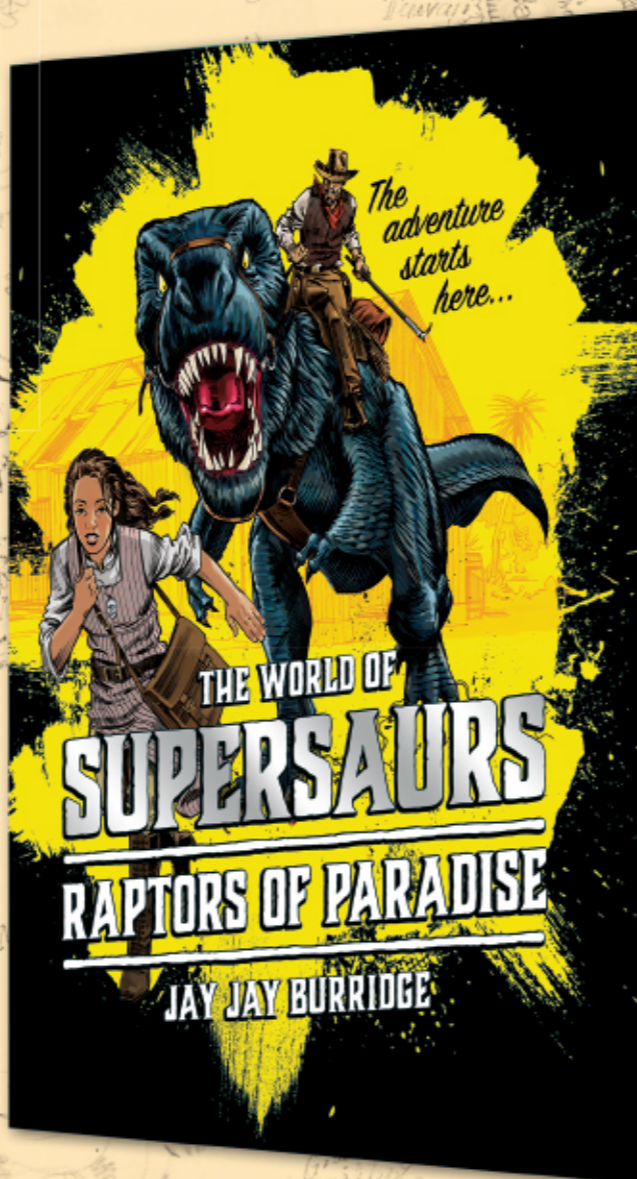

# THE WORLD OF SUPERSAURS

## RAPTORS OF PARADISE

Imagine if dinosaurs had survived and evolved, and now lived side-by-side with humans. Welcome to the exciting world of Supersaurs...

Bea Kingsley's parents vanished 11 years ago. But when Bunty, Bea's grandma, suddenly decides to take her on an exotic journey to the remote islands of Aru in Indonesia to see the elusive Raptors of Paradise, 13-year-old

Bea starts asking questions – big questions that even her wise godfather Theodore can't answer. And the more questions Bea asks, the more trouble comes her way. Was the trip to Aru a dangerous mistake, or is it the beginning of the adventure of a lifetime?

### Unlock more adventures!

Bring your copy of *Supersaurs* to life with the free Interactive *Supersaurs* Augmented Reality app! To access all the exclusive content, download and launch the free app, point your device's camera at the book's illustrations and watch as the pictures pop out of the page. You'll see Supersaurs as you've never seen them before. Awesome!

### Supersaur search!

Ten creatures from the book are hidden in this grid. Can you find them all?

- ALLOSAUR
- BLUEPAN
- CASSABANJI
- GOLDEN FANTAIL
- HADROSAUR
- KYLOSAUR
- MIMUSAUR
- OVIRAPTOR
- RAPTOR
- RHIPTUS RHAT

KNO		ART
HER		OZE
FEA		UDE

Answers on page 56

**Deadly differences!**  
 Can you spot the eight differences between these two pictures of mimosaurs from the book?

### 5 Fearsome facts!

Get your teeth into this incredible info about REAL dinosaurs...

- 1 *Tyrannosaurus rex* had 60 saw-edged gnashers in its mouth, each up to 20cm in length – the monster meat-eater's bite was so powerful it could crush through bone. Yikes!
- 2 Amazingly, *T. rex* is more closely related to a SPARROW than it is to fellow dino *Triceratops*! And it lived closer in time to YOU than *Stegosaurus* (below, right). Whoa!
- 3 Although it was a whopping 9m in length, hefty herbivore *Stegosaurus* had a very small head – its tiny brain was the size of a plum!
- 4 So far, 108 species of dinosaurs have been unearthed in the UK and Ireland. The oldest one found was *Thecodontosaurus* (left), which lived 227 million years ago, during the Late Triassic period!
- 5 A fossil of *Bambiraptor*, a small feathered dinosaur (right), was discovered in 1995 by a 14-year-old American school boy. Cool!

### What if dinosaurs hadn't died out?

In *Supersaurs: Raptors of Paradise*, the Saurs are kept at home as pets and used by people for work or transport. But what would these creatures be like if they really were alive today? Well, no one knows for sure. Some scientists have argued that they would resemble two-legged crocodiles. Others have wondered whether they might look a bit like humans! Remarkably, though, theropods (two-legged dinos) really ARE alive today – because they evolved into birds. How dino-like does this cassowary (right) look?!

### WIN! Supersaurs books!

We've got five copies of *Supersaurs* to give away! For your chance to run off with a copy, just answer this question...

Q Approximately how many years ago did dinosaurs die out?  
 a) 65 b) 65,000 c) 65 million

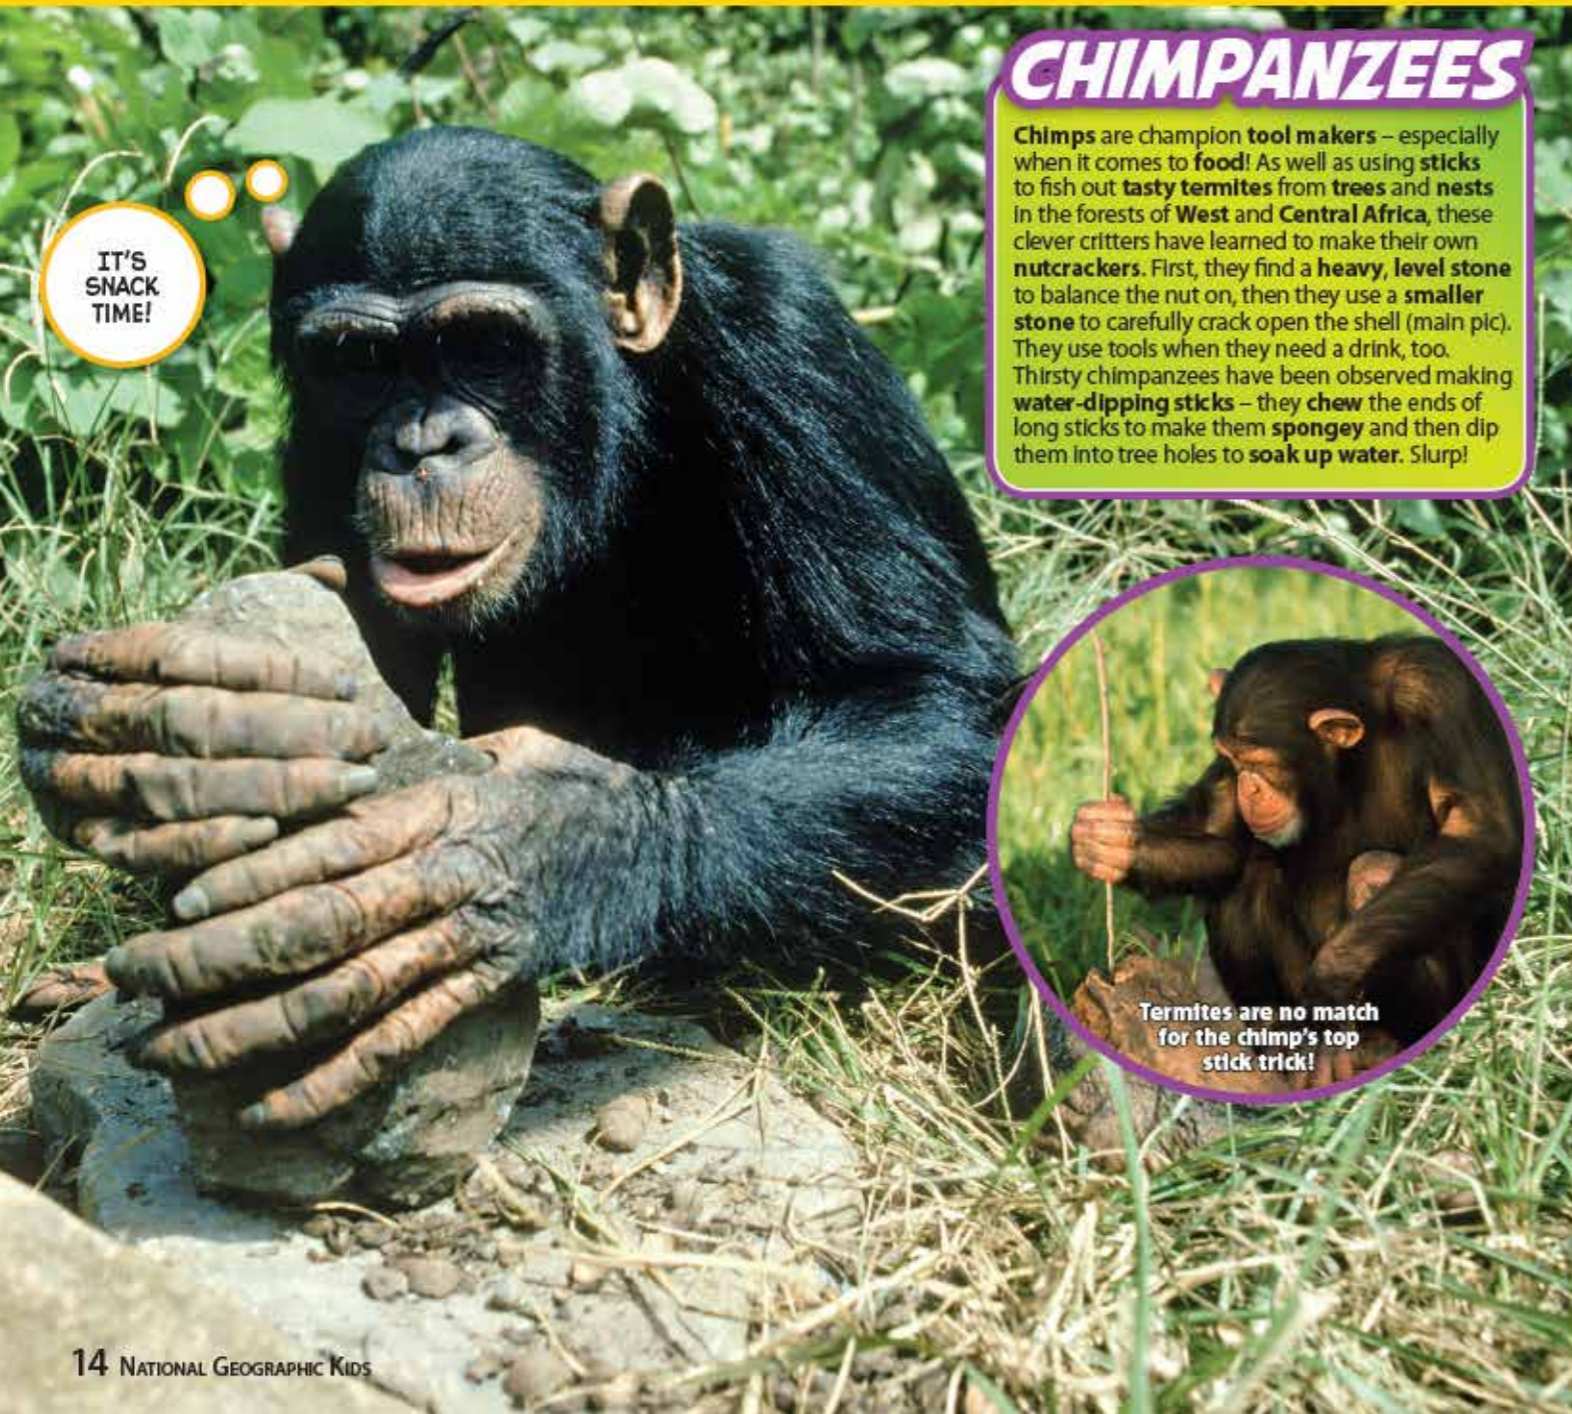

Enter on page 55

# CLEVER CREATURES!

It's not just us humans who have the brains to invent handy gadgets. Check out eight other incredible animals that make and use tools...

IT'S SNACK TIME!

## CHIMPANZEES

Chimps are champion tool makers – especially when it comes to food! As well as using sticks to fish out tasty termites from trees and nests in the forests of West and Central Africa, these clever critters have learned to make their own nutcrackers. First, they find a heavy, level stone to balance the nut on, then they use a smaller stone to carefully crack open the shell (main pic). They use tools when they need a drink, too. Thirsty chimpanzees have been observed making water-dipping sticks – they chew the ends of long sticks to make them spongy and then dip them into tree holes to soak up water. Slurp!

Termites are no match for the chimp's top stick trick!

## OCTOPUSES

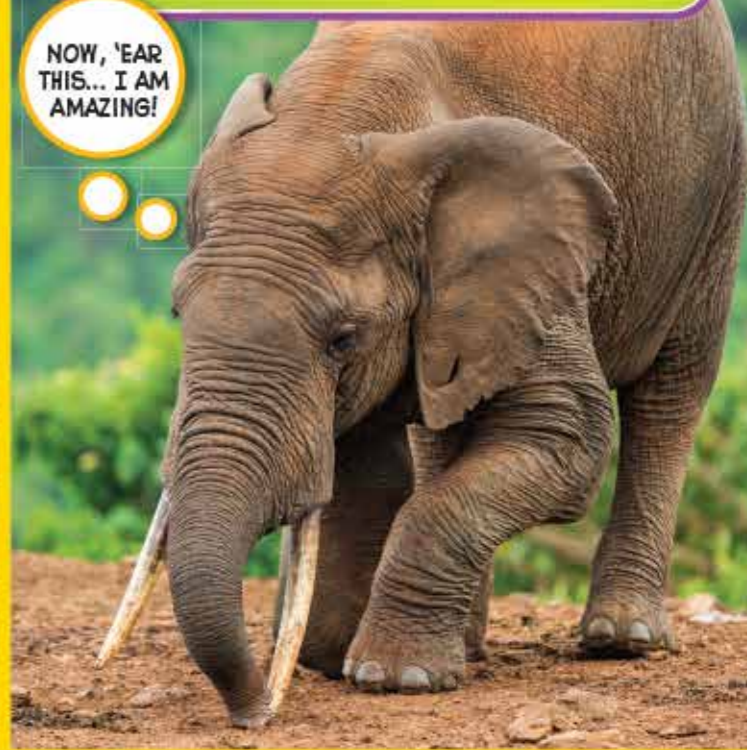

The kings of hide and seek, octopuses (or octopi) can change their shape, colour and even skin texture to blend in with their surroundings. But some of these incredible invertebrates have another trick up their, err... tentacles! In the waters off Indonesia in Southeast Asia, veined octopuses make portable hiding places – from coconut shells! Scientists have observed the super swimmers carrying halved coconut shells that they've collected off the ocean floor. Then, when they sense danger, they hide under them or assemble the shells around their bodies to make safe shelters. Peekaboo!

I LOVE MY COCONUT HUT!

## ELEPHANTS

Elephants are super-strong animals, equipped with muscular trunks and bulky bodies. But did you know they have brilliant brains as well as brawn? These massive mammals have a special way of storing water – they dig water holes, which they fill with chunks of chewed-up tree bark and cover with sand. This stops the water from evaporating, so the elephants can return to the hole whenever they fancy for a cheeky drink! The nifty nellies make other tools, too – they use long sticks to scratch those hard-to-reach itches, and bushy branches to swat away pesky flies. Swish swish!

NOW, 'EAR THIS... I AM AMAZING!

## SEA OTTERS

Allow us to introduce you to the tool-making pioneers of the animal kingdom – super sea otters. Scientists believe these cute critters have been using tools for thousands or even millions of years – long before other marine mammals! Found in the Pacific waters off North America, Japan and Russia, sea otters like to munch on shellfish, such as clams and sea snails. When they fancy a bite, they can be spotted swimming on their backs, with rocks on their chests and the shellfish in their paws! Then, it's crunch time – the otters hammer open the shelled snack before tucking into the fishy flesh inside. Yum!

I'M CLAM-OURING FOR THIS CLAM!

## NEW CALEDONIAN CROWS

Meet some fab fliers who prove our feathered friends can be expert tool-makers, too! Native to **New Caledonia** in the **South Pacific**, these cool **crows** use **sticks** to extract scrummy **bugs** hiding in **cracks** and **crevices** in logs. But here's the really impressive bit – the brainy birds use their **feet** and **beaks** to **bend** twigs into a **hook** shape, making them more effective grub-grabbers! The crows insert their well-crafted tools into the insects' hidey holes and then **shake them** about until the prey latch on. Then, they pull out the twig with the bug attached. Voilà, it's creepy-crawly kebabs for dinner!

I WON'T CROW ABOUT MY SKILLZ!

## LONG-TAILED MACAQUES

It turns out humans aren't the only ones who take **dental hygiene** seriously. So do **Thailand's long-tailed macaques**, who've found the perfect tool to clean their teeth with – **human hair**! Some of the cheeky critters living by a Buddhist shrine in the city of **Lopburi** have been seen **flossing** their teeth with **strands of hair** they've **snatched** from passing people. Ouch! What's more, the macaque mums sit face to face with their youngsters, **teaching** them how to floss. No hair within reach? The mischievous monkeys make do with **coconut fibres** and **twigs** instead. Say cheese!

THIS NEW FLOSS IS FAB!

I NOSE HOW TO CATCH FISH!

### DID YOU KNOW...?

Sea sponges are marine animals that have spongy bodies and no organs. Some deep-sea species can live for thousands of years!

## BOTTLENOSE DOLPHINS

**Bottlenose dolphins** from **Shark Bay, Western Australia**, have come up with a cunning tool that protects their **'noses'** while they're hunting for fish hiding on the **rocky seabed**. They rip **sea sponges** (see above) from the ocean floor, and fit them over their delicate **beaks**! The marine mammals then push their sponged-up snouts along the seabed, disturbing the sand and **scaring** prey out into open water. Gulp! Job's a good'un – without even a scratch!

DO YOU LIKE MY NEW BROLLY?!

Young orangutans are taught these leafy tricks, too!

## ORANGUTANS

Our final great gadget maker is from the islands of **Borneo** and **Sumatra** in **Southeast Asia** – the **orangutan**! During heavy rainfall, these amazing apes keep dry by sheltering under enormous umbrellas made from rainforest leaves. But they have another, more **'musical'** use for the leaves, too. Usually, the tree-top dwellers ward off potential predators by **pursing their lips** and producing a **high-pitched sound** called a **kiss squeak**. But if they want to appear **extra aggressive**, some orangutans **press leaves against their lips** as they squeak, making the call **deeper** and more **intimidating**. Crafty, eh?

# History's Greatest Hits!

ALL ABOUT

## JOAN OF ARC

French heroine Joan of Arc was one of the world's first female military leaders. Find out more about the life of this legend...

Historians don't always know the exact dates of events from ancient times. That's why you'll see a 'ca' next to the years listed below. It stands for 'circa,' meaning 'around.'

C'MON, FRANCE! PUT SOME MUSCLE INTO IT!

START

CA 1412

Jeanne d'Arc (or Joan of Arc in English) was born into a family of farmers in the village of Domrémy, France. She probably spent her early years taking care of animals and sewing.

1415-1425

English troops invaded France and forced French King Charles VI to name England's Henry V as France's next king. But in 1425, three years after Henry V's death, young Joan began to have visions telling her she could save her country by restoring the throne to Charles VI's son, Charles VII.

APRIL 1429

Teenage Joan – dressed like a man – visited Charles VII, demanding that he let her fight on his behalf. Even though he realised she was a woman, he agreed, allowing her to lead his soldiers in battle. Out, Joan!

JULY 1429

After months of fighting, Charles VII was crowned King of France – thanks in large part to Joan's efforts.

1430

Joan was captured and sold to the English. They accused her of lying and dressing like a man, among other charges. She was thrown in jail to await trial.

YOU'RE WELCOME, FRANCE.

1431

Found guilty, Joan was burned at the stake, aged just 19. Nearly 500 years after her death, the Roman Catholic Church made her a saint, and she's still seen today as a fearless leader who changed the course of her country's history.

ADVERTISING PROMOTION

Calling all super sleuths! Get ready to tackle this thrilling series of detective stories by Robin Stevens...

When Daisy Wells and Hazel Wong set up their very own secret detective agency at Deepdean School for Girls, they struggle to find any truly exciting mysteries to investigate.

Until, that is, Hazel discovers a dead body in the school gym! It's not long before their Detective Society is solving real-life murder mysteries better than any police officer could...

### Sleuth secrets!

Become a crime fighter by following the girls' top tips...

#### 1 Create a code

Keep your notes and messages secret with this clever detective's trick!

- Take the first letter of the word you want to write and move it to the end of the word.
- Add the letters 'ay' to the end of the word as well.
- But if the word begins with a vowel (A, E, I, O or U), just add 'yay' to the end of the word instead.
- Use these rules on every word you write to create your coded message!

This is a secret = Histay isyay ayay ecretsay

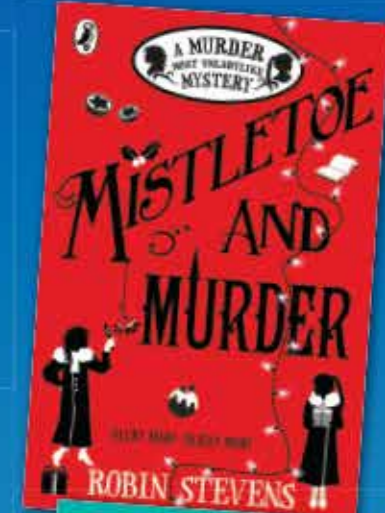

Follow me = Ollowfay emay

#### 2 Write in invisible ink

Got the secret code cracked?! Now scribble it down using this awesome 'ink'...

- Squeeze some lemon juice into a bowl and then add a few drops of water.
- Mix the water and lemon juice together with a spoon.
- Dip a cotton bud into the mixture and write your message on to some white paper.
- Wait for the juice to dry so it becomes completely invisible.
- When you're ready to read your secret message or show it to someone else, gently heat the paper by holding it close to a lamp or torch – your message will appear. Amazing!

Find out more about the author at [robin-stevens.co.uk](http://robin-stevens.co.uk)  
Follow Robin on Popjam @RobinStevens

**WIN! The entire book series!**

One lucky reader will win the whole set of Robin Stevens' books and nine runners-up will scoop a copy of *Murder Most Unladylike*. Cool! To be in with a chance of winning, just answer this question...

- Q Which of these is NOT another word for detective?
- Sleuth
  - Investigator

# BADGER RESCUE!

An orphaned baby gets a second chance...

During a torrential rainstorm in Somerset, a farmer heads outside to check on his sheep. The flock is safe, but he stumbles across another animal in serious trouble. Lying motionless on the ground is a tiny, almost furless badger cub. The farmer notices a flicker of life, so he tucks the tiny creature into his pocket and drives to a nearby animal rescue centre.

### ROAD TO RECOVERY

By the time the cub arrives at Secret World Wildlife Rescue, it's wriggling and making a badger's distinctive chirping sound. The staff are pleased to see that the female cub has no wounds or parasites. "She's so perfect," says Pauline Kidner, founder of Secret World. "But she's very young." Less than 48 hours old, the little animal is vulnerable to many serious health problems.

### JUST WARMING UP

The tiny baby badger's mother would not have willingly abandoned her cub. Badgers live underground in family burrows called setts. Pauline believes the cub's home flooded during the storm and the mother lost the newborn while moving her other cubs to a dry, backup sett. The biggest concern for Gale - named after the windy storm she was found in - is her low body temperature. The staff place the orphan in a warm incubator and give Gale a hot water bottle wrapped in a towel and a teddy to snuggle up to. Once the baby badger has warmed up, Pauline starts feeding her milk. Newborn badgers eat very little, very often - about once an hour, 24 hours a day - so Pauline sleeps on a chair with Gale on her lap, feeding her with a medicine syringe throughout the night.

IN GOOD HANDS

### BACK TO THE WILD

When Gale is six weeks old she opens her eyes for the first time. At ten weeks she begins to crawl around on her shaky legs, and once the little badger starts scoffing solid foods, she's moved into a small pen where human contact is minimised. "Otherwise they grow up thinking they're human beings," Pauline says. Two weeks later, Gale joins a group of other badgers. During four months of preparation for release, the badgers live in an artificial sett, learn survival skills, and get their first taste of wild badger food - earthworms. Yum! When Gale is eight months old, she and five other badgers are transported to the countryside. Here, a temporary sett has been built and sectioned off with a circular fence. A month later, after the badgers have learned to forage and dig their own

GETTING WEIGHED

sett, the fence is removed. Pauline admits that she's a little sad to see Gale go. "It's fantastic, though," she says, "because the whole point is to get that badger back into the wild." Aww-some work, Pauline!

I REALLY DIG THIS PLACE!

GALE (RIGHT) MAKES A FRIEND

A badger can eat over 200 earthworms each night. Whoa!

Traffic is the biggest threat to badgers in the UK. Sadly, 50,000 are killed each year by cars - so ask any drivers you know to slow down on country roads! Find out more at badger.org.uk

# REAL OR FAKE?

These may be some of the most bizarre stories you've ever read – but only three of them are actually true. Can you tell the difference between the real-life headlines and the phony-balonies? (ANSWERS BELOW)

1

## COUNTRIES BATTLE OVER BIRD POOP

**CHINCHA ISLANDS, PACIFIC OCEAN**  
Battles have been fought over many things – taxes, oil, spices... poop? Yep. A two-year battle over islands covered in bird poo, or guano, broke out between Peru and Spain during the 1860s. Why the fuss over faeces? At the time, guano was in high demand as a fertiliser. And it turns out the dry climate of the Chincha Islands in the Pacific Ocean perfectly preserves the guano left by seabirds. In fact some guano piles reportedly stood 45m tall! Spain wanted to take control of the islands from Peru, a former colony. But the Peruvian government refused – and fighting broke out. Peru won the war, and to this day remains the owner of the precious poop.

Illustrations © Tom Neck/Corbis

3

## ROBOT HITCHHIKES ACROSS CANADA

**VICTORIA, CANADA**  
Would you give a ride to a talking, hitchhiking robot? Well, 19 carloads of Canadians did exactly that during the summer of 2014, helping the child-sized hitchBOT travel 6,000km from Halifax to Victoria. Anyone who offered hitchBOT a ride had to lift it into and out of the car because only its hitchhiking arm moved. But hosts were rewarded with a robot that could chat with its companions and share facts about the region the car was travelling through. The bot had tons of 'fun' along the way, sightseeing, making new friends, riding a ferry and even attending a wedding!

4

## PLANTS MAKE MUSIC

**LOS ANGELES, USA**  
Did you know that plants can be 'musical'? Technology developed by a company called Data Garden translates the electrical currents moving across a plant's surface into sounds. The company have organised 'concerts' and installations, and they've even created a radio station, Plants FM, which live-streams plant 'music'. So what does this tell us about the secret life of plants? Scientists still aren't quite sure. But thanks to a successful fundraising campaign, anyone with a computer can now find out whether their houseplants can 'sing'!

5

## ASTRONAUT INFESTATION

**OUTER SPACE**  
In what was dubbed the 'out-of-this-world itch' half the astronauts aboard the space shuttle *Triumph* were ordered to return to Earth after an epic outbreak of head lice struck in 1994. At first the astronauts tried to live with the lice, making jokes while scratching their scalps during video conference calls with NASA. When things got worse, all shaved off their hair. But over time the lice proved too powerful. The astronauts couldn't get rid of them and were distracted from their high-stakes duties. So they were sent home to recover. NASA says it's unsure whether the extra-persistent pests were extraterrestrial. Yikes!

2

## SEAFLOOR CITY

**CHINA**  
In 2015, China surprised the world when it announced it had secretly set up a 'city' of 1,000 people on the seafloor off the country's southeastern coast. Encased in a see-through dome, Seafloor City is protected from the ocean elements by a 335-m-thick transparent material developed in a lab in the city of Shanghai. At 5km<sup>2</sup>, the city is small but it's packed with the nation's smartest scientists. The government has tasked them with studying how people might live on other planets, and how the human body can adapt to life underwater. Seafloor City is set to become a major tourist destination next year, but only expert divers will be able to reach it.

Answers to the bizarre tales

# HOW TO SPOT FAKE NEWS!

This page may just be a fun game, but can you always believe everything you read? Sometimes it's hard to tell the difference between real-life headlines and made-up ones – especially on the internet. Some people are trying to trick you on purpose. Follow these tips for sniffing out fake news...

**Does the story come from a newspaper, magazine or website you've never heard of?**

"Well-known news sources aren't likely to try to fool you," says Eric Carvin, social media editor for the Associated Press. "If you haven't heard of a publication, do some research on how trustworthy they are before you take what they say as fact. Have they been accused of publishing fake news before? If so, they may not be reliable."

**Is just one newspaper, magazine or website reporting the story?**

"If a story is real, then many newspapers and magazines will cover it," Eric says. "Big stories worth reporting on are usually featured in more than just one or two publications."

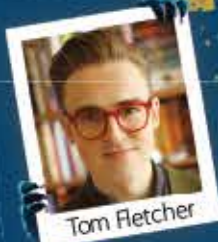

**Is the story missing key information?**

"If no experts or eyewitnesses are mentioned in the article, that's a warning sign," Eric says. "Most publications try to speak with at least two sources to back up a story."

# THE CREAKERS

Discover a ghastly world under your bed in this magical new tale from the bestselling author of *The Christmasaurus*, Tom Fletcher, and illustrator Shane Devries...

Have you ever heard a creaking noise in your house at night? If you have, then you've probably got Creakers living under your bed! They're the disgusting stars of Tom Fletcher's newest, spookiest and smelliest book!

See that awesome girl on the front cover in the dungarees? That's Lucy Dungston, she's the hero of this story - she just doesn't know it yet! She's smart, brave and maybe a little messy from time to time. But she's exactly who you need when the Creakers start making

mischief. Look closely and you'll see she's wearing goggles on the top of her head - now, why could that be?

One morning, Lucy discovers that all the grown-ups have disappeared - as if into thin air - and chaos descends as the children in Lucy's town run riot. It's mayhem. It's madness. To most kids, it's amazing! But Lucy wants to find out the truth. She's coming up with a plan to get the grown-ups back and nothing's going to stop her... except maybe the Creakers!

OUT NOW!

## CREAKERS CROSSWORD!

Answers on page 56

Can you work out which words from the book are in this puzzle?

### ACROSS

- 2 The Creakers illustrator (5, 7)
- 5 A noise people make when they're feeling grumpy. Pigs do it too (5)
- 7 What's Lucy wearing on her head? (7)
- 8 They could be living under your bed (8)
- 9 Feeling itchy? Then have a good \_\_\_\_\_ (7)

### DOWN

- 1 What you may do when you have a cold or are upset (5)
- 3 Yucky (10)
- 4 Hero of this story (4)
- 6 Author of *The Christmasaurus* (3, 7)
- 7 Another name for a fart (4)

## THINGS THAT HIDE UNDER THE BED!

Meet some fascinating wild beasties that creep while you sleep...

### Cardinal spider

This awesome arachnid is the largest species of spider found in the UK - its legspan can be over 12cm! But don't let it frighten you. The super spider, found in homes around southern England, is an amazing natural pest controller, chomping on loads of insects each year. Yay!

### Dust mite

Less than 0.5mm in length, this tiny chap has survived on Earth for more than 20 million years. Wow! Feeding on dead skin that's fallen onto carpets and furniture, its poo contains chemicals that some people are allergic to - so get the vacuum cleaner out and suck up this nifty nibbler!

### Common clothes moth

This mischievous moth lives in dark attics, wardrobes and carpets in homes around the UK - its larvae eat the keratin found in natural fibres such as wool and silk. Yum! They love warmth, and find sweat and food stains extra tasty - so turn radiators off in empty rooms and wash your clothes!

## CREEPY CREATURES!

Which of these four Creakers do you think looks and sounds the most disgusting?

**Guff**

Messiness: 68    Smelliness: 100  
Scariness: 52    Icky-stickiness: 75

**Scratch**

Messiness: 84  
Scariness: 74  
Smelliness: 39  
Icky-stickiness: 68

**Grunt**

Messiness: 31    Smelliness: 60  
Scariness: 89    Icky-stickiness: 95

**Sniff**

Messiness: 20  
Scariness: 34  
Smelliness: 37  
Icky-stickiness: 81

## DRAW YOUR OWN CREAKER!

Felt-tips out, gang! Because it's time for you to create your own Creaker. Draw it in the space below and don't forget to give it a rot-some name and some rancid ratings, like the ones on the left. Will yours be spiky, slimy or smelly?!

Name: \_\_\_\_\_  
Messiness: \_\_\_\_\_  
Scariness: \_\_\_\_\_  
Smelliness: \_\_\_\_\_  
Icky-stickiness: \_\_\_\_\_

Do you know  
someone  
who loves  
**ORCAS?**

From £4  
a month

### Adopting an orca helps protect their future...

Orcas are amazing but too many are dying. Poisoned by polluted seas. Accidentally caught in fishing nets. Some are even taken into captivity. **By adopting an orca with Whale and Dolphin Conservation you can help us give orcas the protection they need to survive.** Your support will help us protect them from activities such as industrial development, fish farming,

logging and pollution. We'll send you your very own adoption pack, including, a personalised certificate with a picture of your orca, a set of fun stickers and a colourful WDC badge. We'll keep you up-to-date on their daily lives through a great quarterly magazine, a monthly e-newsletter and you'll receive an email birthday and Christmas card.

### You can adopt:

#### Bend

Bend was a surprise from the time she was born. No one had ever seen an orca quite like her. On the front edge of her dorsal fin was a deep cut and it grew lopsided taking on a comical look. She became a mother for the first time in 2013.

or

#### Fife

Fife was born in 1992 and is the younger brother of Corky. Tragically, Fife has never met his sister as she has been held in captivity by SeaWorld since 1987. He is quite a character, extremely handsome and gaining stature within his community.

# THE ROYAL RABBITS OF LONDON

## ESCAPE FROM THE TOWER

Watch out, world! It's time for a wild new Royal Rabbits' adventure...

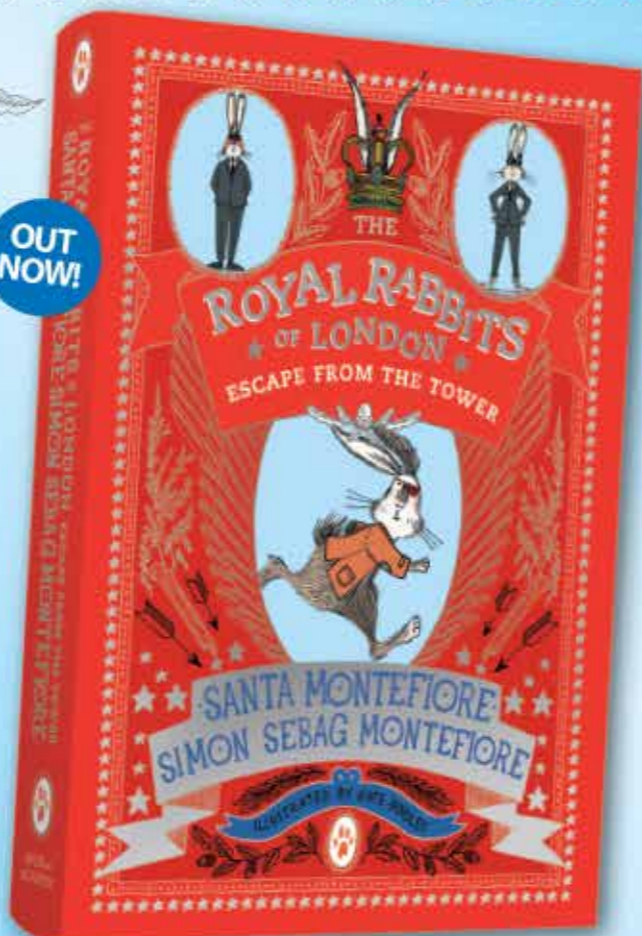

**Shylo Tawny-Tail** is proud to call himself one of the **Royal Rabbits of London**, a secret society who live under **Buckingham Palace**, battling baddies around the world.

Across the River Thames, high up in London's famous skyscraper **The Shard**, the evil **Ratzis** are plotting to cause chaos during a visit from the **President of the United States**. And when Shylo is kidnapped following an attack on the Royal Rabbits' **Grand Burrow**, it looks as

though they might just manage it! Can Shylo escape in time to save the day? Anything in the world is possible, as long as you have will, luck, a moist **carrot**, a **wet nose** and a slice of mad **courage!** *Escape from the Tower* is the second book in the exciting series from writers **Santa Montefiore** and **Simon Sebag Montefiore**, and awesome illustrator **Kate Hindley**. It's *gnaw*-some!

OUT NOW!

## BATTLE OF THE BUILDINGS!

In the book, the Royal Rabbits' Grand Burrow is hidden underneath London's most famous home, Buckingham Palace. Their enemies, the Ratzis, are held up in The Shard. Check out these four phenomenal facts about both brilliant buildings...

### THE PALACE!

- 1** Buckingham Palace has a whopping **775 rooms** – including 240 bedrooms, 78 bathrooms, a cinema, swimming pool, post office and police station!
- 2** Home to the Queen, the palace has the **largest private garden in London** – four times the size of Wembley Stadium!
- 3** Buckingham Palace contains **350 clocks and watches!** Two full-time staff are paid to wind them up each week. What a job!
- 4** There really are **tunnels hidden underneath Buckingham Palace!** It's rumoured that the royal warren extends all the way to the Houses of Parliament.

### THE SHARD!

- 1** Towering **309.6m** over London, The Shard is the **tallest building in the UK**. On a clear day, you can see the sea from the top. Whoa!
- 2** The skyscraper's exterior is made out of a whopping **11,000 panels of glass** – enough to cover eight football pitches!
- 3** The Shard's lifts travel at **six metres per second** or nearly **21kmph**. Hold tight!
- 4** In 2011, construction workers found a **fox living on the building's 72nd floor!** Named **Romeo**, it's thought it had survived by eating scraps of food left behind by the builders. Wow!

**WIN! ROYAL RABBITS BOOKS!**

We're giving away five copies of *Escape from the Tower* and the *Royal Rabbits of London*, the first book in the series! To be in with a chance of winning, just answer this question:

**Q** Can you unscramble these letters to reveal a rabbit's home? **WROUBR**

Enter on page 55

### DID YOU KNOW...?

Rabbits were first introduced to Britain by the Romans. Today, more than 38 million of them live in the wild in Britain!

# Incredible stories from the files of... GUINNESS WORLD RECORDS

Your lashes are enormous!

## LOOOOOONG LASHES!

Ever had a tiny eyelash in your eye that you can't quite fish out? Well, that's one thing this lady doesn't have to worry about, because **You Jjanxia** has the **longest eyelashes in the world!** Measured back in June 2016 in **Jiangsu, China**, her lengthiest lashes dangle from her left upper lid, growing to an incredible **12.4cm**. Eww!

MOVE OVER, GREEN GOBLIN!

## HOVERBOARD HERO!

Meet superhero **Franky Zapata**! OK, he might not *actually* have superpowers, but in April 2016 he soared through the sky and smashed a world record. Pow! Franky took the title for the **farthest flight on a hoverboard** when he travelled over **2.2km** on his jet-powered device off the coast of **Sausset-les-Plins in France**. Air-mazing!

## DOUGH MY GOSH!

Here's a snack sure to fill you up – it's the **world's largest pretzel!** Made in October 2015 by a company called **Industrias La Constanca** in **El Salvador, Central America**, the super-sized snack measured **8.93m long**, **4.06m wide** and weighed almost **784kg** – that's as heavy as a **cow!** Wonder how long it took to eat?!

Try getting your teeth into this tasty treat!

For more furry fun, hop over to [theroyalrabbitsoflondon.co.uk](http://theroyalrabbitsoflondon.co.uk)

# SONORAN SUNRISE

Join us as we travel to Arizona in the USA to see some cool cacti in the hot, hot desert!

We picked a toasty time to visit – it's July, and Arizona is right in the middle of an almighty heat wave! The temperatures are so extreme (up to 48°C) that some planes have been unable to take off, and brave fire crews have been battling wildfires across Arizona and all over western USA.

To beat the heat, we're visiting Saguaro National Park at 5am, before the temperatures get dangerously high.

"We recommend that visitors complete their outdoor activities by 9am," explains Park Ranger Cam Juarez, as we trek through the dusty landscape. This protected park is in the vast 260,000km<sup>2</sup> Sonoran Desert, which stretches across southwestern USA and into Mexico.

## KEEPING COOL

"Listen for rattling sounds and keep scanning the ground," warns Cam. "This is about the time that the rattlesnakes start slithering back to their underground burrows – it's too hot for them in the day." To avoid the baking

temperatures many desert animals, such as scorpions or tarantulas, are nocturnal, and others, such as snakes and rodents, are only active in the early morning or late evening when it's cooler. Black-tailed jackrabbits, who are out and about all day, have huge ears which help disperse heat (see bottom), and Harris's antelope squirrels hold their tails above their heads for shade. Clever!

## COLOSSAL CACTI

Cacti have a surprising way of keeping cool, too – their spines! Not only do the spikes provide protection, they also cast slender shadows, keeping the surface shaded. Of the 25 types of cacti that grow in the Sonoran Desert, the most famous is the mighty saguaro (say 'sa-war-oh'), which the park is named after (see main pic). These giant green columns tower over us, their 'arms' held aloft as if they're waving! "The tallest can grow 16 metres, and they weigh up to ten tonnes during the rainy season – so don't park your car next to one!" laughs Cam. He might be joking, but these majestic plants do occasionally topple over in strong winds.

That's because their roots – which stretch out as far as the cacti are tall – are remarkably shallow, just 10-15cm in depth!

## SAGUARO HOTELS

Gazing up at the saguaros, we notice little birds darting in and out of holes in their sides. "Gila woodpeckers peck nests into the cactus flesh", explains Cam. "A kind of 'scab' forms on the inside, which stops the cactus oozing liquid and creates a dry, insulated cavity." Once the original

baby birds have flown the nest, other birds move in – some saguaros here are home to elf owls, screech owls, finches and sparrows!

It's been hotting up as we walk, and now the sun is beating down big time. Unfortunately, we're way too bulky to crawl into a cool cactus cavity, so we retreat to the blissfully air-conditioned car, with a new found respect for the desert dwellers of the Sonoran Desert!

The beautiful white flowers of the saguaro are in bloom for just one day!

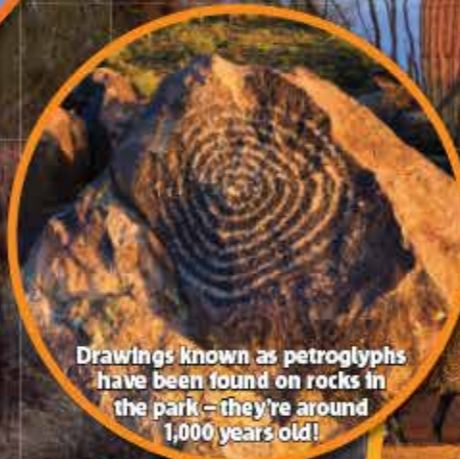

A cactus wren at the entrance to its saguaro nest

Jackrabbits' ginormous lugs help keep them cool!

Rattlesnakes shake their tails to ward off predators

Drawings known as petroglyphs have been found on rocks in the park – they're around 1,000 years old!

Javelinas (say 'have-a-leenas') look like wild boars. They love to eat prickly pear cacti, but will also scoff dead lizards and rodents!

Accordion-like pleats expand when it rains, so the cactus can swell up and hold more water!

The Sonoran desert has a short, summer rainy season with violent thunderstorms. It even snows sometimes!

Extreme temperatures, such as frost, can cause cactus arms to flex and bend downwards.

Saguaro cacti can live for up to 200 years! Their 'arms' don't appear until they're at least 75.

Turn over to meet some more amazing animals from the Sonoran Desert...

# AWESOME ANIMALS OF ARIZONA!

Meet five freakishly ferocious species from the Sonoran Desert...

It's Ranger B!  
(The B stands for Brennan!)

These speedy birds can even take on rattlesnakes!

BEEP BEEP!

## ROADRUNNER

"Forget snakes and scorpions – I'd say this little bird is one of the most vicious, cold-blooded killers in the Sonoran Desert!" marvels Ranger B. He's a ranger at **Urey Mountain Regional Park**, one of Arizona's many protected parks, and he knows a thing or two about the species here! The super-speedy bird, Ranger B explains, can run along the ground at up to **30kmph** – **outrunning most humans** – and it has top **hunting skills**, too. "If it sees prey, such as a **rattlesnake**, it quickly grabs it, then smashes the head against the ground to kill it," he says. "I've even seen roadrunners **carrying** dead prey around all day in their mouths like a **packed lunch**. They take chunks when they're feeling peckish." Nom!

Roadrunners are the fastest ground-running flying birds in the world!

Staying safe in the desert is easy if you stick to the trails! Venomous wildlife doesn't like human contact and will only ever attack if threatened!

HOOO  
OOOO  
OOOOWL!

This really IS a Danger Mouse!

## GRASSHOPPER MOUSE

Meet another surprising Arizona assassin – the **grasshopper mouse**! This **12-16-cm-long** rodent might look cute, but it's a fearsome and aggressive hunter. As well as eating other **mice** and stealing their burrows, this furry fighter can take down terrifying **tarantulas** and scary **scorpions** with ease. Scientists think it could even be immune to a scorpion's sting! But the coolest thing about this creature? It will often throw its head back, stand on its hind legs and **howl**, just like a wolf. Wow!

## MARICOPA HARVESTER ANT

"Did you know the **most venomous creature** in the state of Arizona is actually an **ant**?!" asks Ranger B. "The **Maricopa harvester ant** is **65 times** more toxic than the **diamondback rattlesnake**. But luckily, it delivers thousands of times **less venom per bite** than the reptile! Drop for drop, though, this ant is the most toxic insect in the entire world!" Its **bee-like stinger** can inject victims repeatedly, too. The venom is mainly for defence, however, and the ant mostly eats **seeds**!

RATTLE-SNAKES? PAH!

A rat could be killed by just 12 Maricopa harvester ant stings!

## GILA\* MONSTER

(\*Say 'heela')

It might be the **biggest lizard in the USA** but this 60-cm pink and black venomous monster is tough to spot! "That's because the **Gila monster** spends around **95% of its life** underground in **burrows**," explains Ranger B. "It **hibernates** through the winter, but during summer it hunts for **eggs, baby birds and rodents** in the morning and evening to avoid the scorching midday sun. The Gila monster doesn't have to eat very often, though, because it **stores fat** from its food in its **chunky tail**." Clever!

HMM... LUNCH... TIME FOR SOME MONSTER MUNCH!

Gila monsters are one of few venomous lizards in the world – but their bite is only used in defence. Phew!

RIGHT, WHO SHALL I SQUIRT NEXT?!

Spiky sides break up the body's shadow, helping the lizard stay unseen

## REGAL HORNED LIZARD

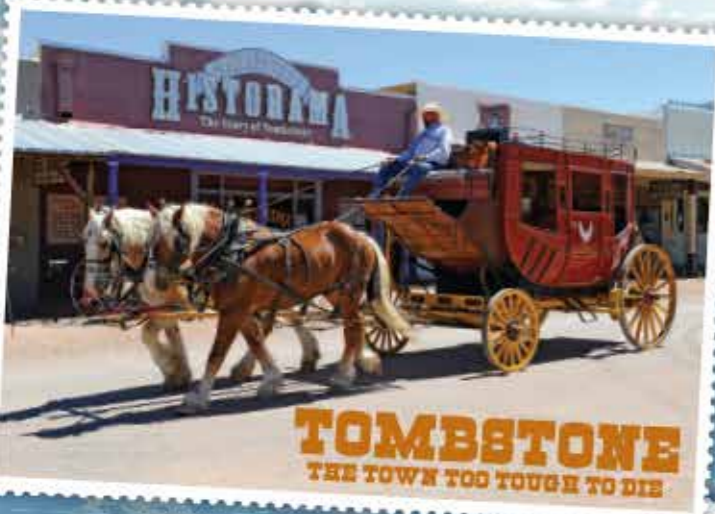

To avoid being gobbled by desert predators, such as **hawks** and **coyotes**, the **regal horned lizard** can keep remarkably still, **camouflaging** itself against the desert floor. But if that doesn't work, the bonkers beast has another, **horrifying**, trick up its sleeve... it **squirts blood** at its attackers – from **its eyes**! The foul-tasting red liquid shoots for up to a metre, and is usually enough to make a predator scamper off in disgust. We're not surprised!

Pictures: Ranger B © Georgia Heaton/Alamy; All others © Getty Images UK.

# Postcards from ARIZONA!

Check out more of the weird and wonderful places we visited on our terrific tour of the state...

**TOMBSTONE**  
THE TOWN TOO TOUGH TO DIE

**High fives from the most haunted town in the USA!**  
Well, that's according to Bisbee's resident magician **Magic Kenny Bang Bang**, who told us some seriously spooky stories before leading us on a fun tour of this quirky town, with his pet **Chihuahua** in tow!  
Founded as a **copper, gold and silver** mining town in 1880, the local mines were some of the richest in the world, producing over **3.6 billion kg of copper!** Since the last mines shut in the late 1970s, a creative community has moved in, but you can still take a tour of the **Copper Queen Mine**, heading underground to see some of the **3,200km of tunnels** where fortunes were made!  
Bye for now, **Nat Geo Kids!** \*Unsubstantiated claim!

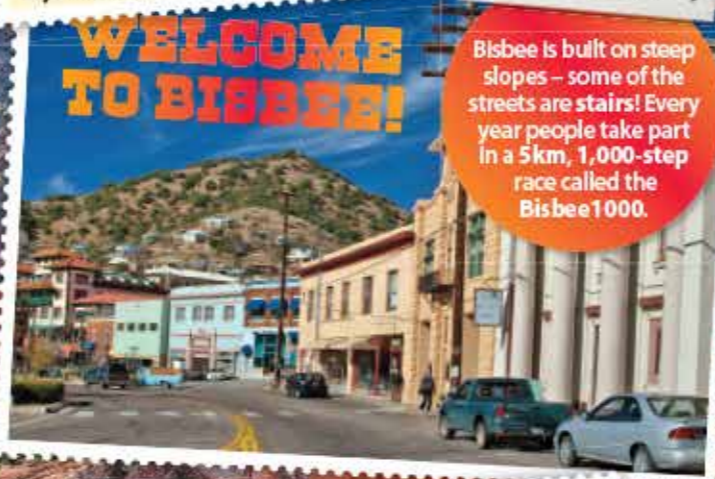

Magic Kenny Bang Bang!

**Howdy, pardners!**  
Today we travelled to the historic **wild west** town of **Tombstone**, whose dusty main street looks like the set of a cowboy movie! After the discovery of **silver** here in 1877, thousands of people arrived to seek their fortune in the mines. But it was a tough life, with lots of violence and crime. In fact, the oldest surviving building, **The Bird Cage Theatre**, still has **140 bullet holes** in the walls!  
One of the most famous shootouts even had a film made about it, called **Gunfight at the O.K. Corral**. We watched a re-enactment of the fight, with **30 shots fired in 30 seconds**. You'll be relieved to know the bullets weren't real!  
Love, **NG KIDS**

Gunfights not your thing? Tombstone is also home to the world's biggest rosebush!

Bisbee is built on steep slopes – some of the streets are stairs! Every year people take part in a **5km, 1,000-step** race called the **Bisbee 1000**.

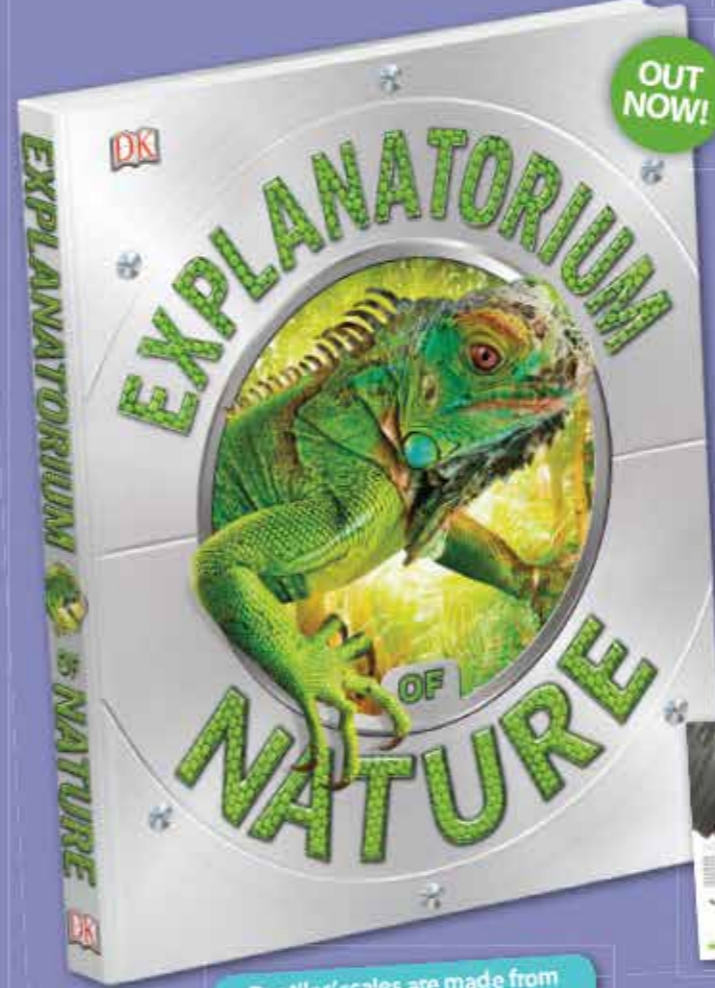

**THE GRAND CANYON**

**Greetings from one of the seven wonders of the natural world – the Grand Canyon!**  
We peered way down to the bottom of this immense canyon, and could just spot the **Colorado River**. Over **two billion years**, its waters have slowly carved out the **1.6-km-deep** crevice, revealing different layers of rock from the Earth's history.  
Today it's a popular spot for visitors – over **six million** tourists visit every year to hike, raft and snap selfies!  
Wish you were here!  
**Nat Geo Kids xxx**

Archaeologists think people have been living near the Grand Canyon for around **10,000 years!**

During our Arizona Adventure we stayed at the Loews Ventana Canyon Resort, Eldorado Suites Bisbee, Residence Inn Phoenix Mesa, Enchantment Resort, Holiday Inn Express Flagstaff and Arizona Grand Resort and Spa. With special thanks to Jon Donahue. For more information about Arizona, head to [visitarizona.com](http://visitarizona.com)

# EXPLANATORIUM OF NATURE

ADVERTISING PROMOTION

Get ready to see the world as you've never seen it before with this wild new book!

From fruit to flowers, shells to sharks and ants to elephants, this extraordinary new encyclopedia is the perfect way to find out how everything in nature works. Did you know that the sphinx moth caterpillar pretends to be a snake to scare off predators?

Or that houseflies have very blurry vision? Discover how sharks hunt, learn how ducks float, see how spiders spin webs, find out how flying works, and much, much more!  
Investigating every aspect of the natural world using cross-sections and cool close-up photos, *Explanatorium of Nature* brings you face to face with nature's most fascinating creatures. It's mind boggling!

Reptiles' scales are made from the same stuff as your hair and fingernails – keratin!

Spider silk is stronger and tougher than steel!

Scientists think the giraffe's tongue is bluey-black to protect it from sunburn as it eats!

## Spot the difference

See if you can spot the eight differences between these two pictures of an iguana...

Answers on page 56

## Explanatorium encyclopedias!

We've got **TEN** copies of this brilliant book up for grabs. To be in with a chance of winning, just answer this question...

- SEM is a type of close-up photography. But what do the letters SEM stand for?
- a) Scanning Electron Microscope
  - b) Stonkingly Enormous Microscope
  - c) Silly Elephantine Microscope

We're sorry, but we won't be able to return your art or photos. Try to make your pictures as bright and colourful as you can.

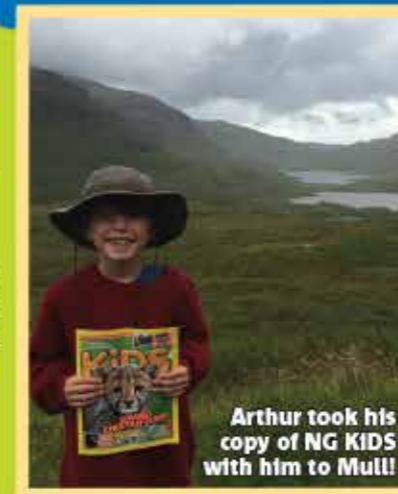

Available wherever books are sold

## LOVELY LOCHS

We visited the Isle of Mull in Scotland. I spent lots of time exploring and trying to spot eagles, otters, seals, dolphins and whales! I enjoyed bird watching – even in the rain! Here I am at a famous landmark called the Three Lochs. See how low the clouds are! When I grow up I would love to be an explorer and live on a small island.

Arthur Green, 7  
 ● What will you discover next, Arthur?!

Arthur took his copy of NG KIDS with him to Mull!

## TINY TOURISTS

My daddy and I decided to see how far we could send my LEGO Minifigures around the world. The characters are Manny, Danny, Sammy, Cardo, Charlotte and Mario, and we sent them on holiday with friends and people from daddy's work. We put the photos in scrap books. This summer they visited India, Belgium, Cyprus, Cephalonia, Hong Kong, Holland, Portugal, Singapore, Spain, USA and Gibraltar! So far they've been to 18 countries and spent 225 hours travelling 115,948km. I've learnt so much doing this project!

William Pugsley, 7  
 ● Your project is very cool, William. It won't be long until they've seen the whole world!

While William has stayed at home in 'Mission Control'...

... his LEGO characters have visited the Grand Canyon in the USA...

... and even Singapore in Southeast Asia!

## SUPER SWITZERLAND

My sisters and I went on our first alpine hike up Schynige Platte in Switzerland. We did a lot of reading about the Jungfrau mountain and were very excited! We then took a cog-wheel train up to the top. It was the most beautiful mountain we had ever seen! My sister Daisy even got to hold an Alpine horn. Then we looked at all the plants in the garden at the top. We felt on top of the world!

Lily Chambers, 8  
 ● Wow! Bet the view from up there was amazing, Lily!

This horn is huge!

All aboard the mountain railway!

Tommy's a fun feline!

## MISCHIEVOUS MOGGIE

I've got a cat called Tommy, he's black and white. He's four and from the RSPCA. He's very cheeky and poos in the bath if you don't clean out his litter tray! But he's really fun to cuddle.

Theo Saml Champion, 8  
 ● Oh no! Hope no one's in it at the time, Theo!

## CARING FOR CUTLEFISH!

We were with our friends at Camber Sands in East Sussex and were lucky enough to find cuttlefish eggs on the beach. We looked after some of the eggs to watch them hatch and then put the babies back in the sea. If we hadn't found them the seagulls may have eaten them and they wouldn't have survived. We love searching for and looking after animals, and both want to be vets when we're older!

Alexe and Chloe Etienne, 8  
 ● Cuttlefish are amazing, guys! Did you know that they can change their colour to hide from predators or attract mates?!

Seren got up close to some cool...

... creepy-crawlies!

## A BUG'S LIFE

I went to the bug farm in St Davids, Pembrokeshire, in Wales. I saw lots of interesting insects and met Jasper the cockroach and Jessica the stick insect. I also went to the bug café – but didn't eat any bugs!

Seren Hopkins, 7  
 ● Those insects you handled were enormous, Seren!

## Quick question

This month, we ask NG KIDS readers...

What's your favourite thing about Bonfire Night?

Joe, 7  
 I love the toffee apples because they're so sweet!

Clódagh, 12  
 The fireworks – they're so pretty!

Adam, 6  
 Catherine wheels. They spin around but don't make you dizzy.

Ella, 13  
 Hot chocolate and sparklers. I can write my name in the air.

James, 9  
 Toasting marshmallows. They're yummy and I get warm by the fire.

## I ♥ THE LAKE DISTRICT

Write in and tell us what YOU love!

“ I visited the Lake District and went fell-walking. Here I am on top of Sale Fell. I also visited the Pencil Museum in Keswick and saw the world's largest colouring pencil. It was HUGE, way too big to fit in a photo! ”

Katie Pool, 8  
 ● We love the Lake District, too, Katie!

## Follow in Paddington's paw prints!

Paddington is happily settled with the Brown family in London, spreading joy (and marmalade!) wherever he goes. In new film *Paddington 2*, the famous bear is searching for a present to buy his Aunt Lucy for her 100th birthday when he sees a pop-up book in Mr. Gruber's shop. But when the pop-up book is stolen, it's up to Paddington to catch the thief.

To celebrate the film's release on **10 November**, we're giving one winner the chance to explore **Paddington's London!** Visit Mr. Gruber's antiques shop, Portobello market, and the home of Paddington at Windsor Gardens, then head to Paddington Station to snap selfies with the Paddington statue. Cool!

One winner will get a **Paddington Tour of London** for their family, a night's luxury accommodation, up to £100 towards travel, plus a *Paddington 2* goody bag. Four runners-up will get goody bags!

**Q** Where is Paddington originally from?  
a) Peru b) Portugal c) Poland  
● Find out more at [paddington.com](http://paddington.com)

## Get building with K'NEX Thrill Rides!

Calling all adrenaline junkies! Now you can create your very own theme park with **K'NEX Thrill Rides!**

The **Web Weaver rollercoaster** (above) includes a glow-in-the-dark track and a motorised spider-themed coaster car. Once built, you can flip it between horizontal and vertical without stopping the cool car from zooming around the track!

With 559 pieces, the **Lunar Launch rollercoaster** (below) is a monster 1.2m tall once built. It has a stomp launcher mechanism, so you can send the coaster's car on an out-of-this-world trip around the space-themed track. Awesome!

The kits include full-colour building instructions, and you can visit [knex.co.uk](http://knex.co.uk) to download free alternate instructions which allow you to build both sets in two different ways!

Four lucky winners will claim both these cool coasters!

**Q** Can you unscramble these letters to reveal something you might eat at a theme park?  
**DANCY SLOFS**

● Available from [knex.co.uk](http://knex.co.uk) and toy stores nationwide

# PRIZE PLANET!

Enter on page 55 or online!  
Just head to [natgeokids.com](http://natgeokids.com)

## Land some sweet Lightseekers goodies!

Get ready for **Lightseekers**, an action and adventure role-playing game that connects smart action figures, accessories, augmented reality trading cards and more. Epic!

Download the game on to your mobile or tablet and play for free. Then, connect a smart action figure to take your gameplay to the next level. The 17-cm characters talk, vibrate and use different coloured lights to show levels, status, warn of danger and guide your gameplay. Attach weapons and use flight packs to turn your figure into a game controller, too. Woah! Five winners will bag a **starter pack, weapon and flight pack.**

**Q** Like **Lightseekers**, which of these animals can change colour?

a) Giraffe b) Chameleon c) Badger

● Get the free game and find out more at [lightseekers.com](http://lightseekers.com)  
Find **Lightseekers** toys and cards at [Toysrus.co.uk](http://Toysrus.co.uk) and [Amazon.co.uk](http://Amazon.co.uk)

40 CHANCES TO WIN!

## Bounce off with King Pong prizes!

Can you conquer **King Pong**? This frantic game of speed, skill and sheer determination pits up to four players against each other in a bouncy battle to see who's best. Boing!

Each player gets a set of five coloured balls. The aim of the game is to get rid of them as quickly as you can by bouncing them into the plastic cube faster than your opponents. But be warned, the pyramid within the cube pings them back out into your tray almost as quickly as you bounce them in. Yikes! The first player with no balls of any colour left slams their tray door shut and wins.

Twenty readers will win a **King Pong** game!

**Q** What's another name for ping pong?

a) Table tennis  
b) Table football  
c) Table cricket

● For more action-packed games visit [drumondpark.com](http://drumondpark.com)

## Zoom away on a RazorX skateboard!

Get ready to be the coolest kid in town with the **RazorX Cruiser Electric Skateboard!** The Cruiser may look just like a normal skateboard, but its 125-watt motor zooms you along at up to 16kmph. Plus, it comes with an awesome wireless remote for super speed control. Gnarly!

The rechargeable battery provides up to 40 minutes of continuous ride time and a handy row of LED lights under the deck helps you keep track of your juice. Then simply charge it up so you're ready to roll next time. Ace!

Two winners will ride off with a **RazorX Cruiser Electric Skateboard.**

**Q** Which of these people is a famous skateboarder?

a) Eddie the Eagle  
b) Jack Sparrow  
c) Tony Hawk

● Available at [argos.co.uk](http://argos.co.uk)

Suitable for age 9+, always wear safety gear when riding, never use in a public place or near traffic and always read the manual before use.

## Bag Wilde Creatures theatre tickets!

Experience the magical mind of famous author, poet and playwright **Oscar Wilde**, as **Tall Stories**, the producers of *The Gruffalo*, present a sparkling new musical adventure – featuring hauntingly beautiful fairytales with a generous dash of comedy. Ace!

Brought to life by a live band of storytelling musicians, **Wilde Creatures** takes you on a fantastical journey through palaces, forests and beyond. Laugh along with characters from Oscar Wilde's classic children's fairy stories as they try to choose a new statue for the town square. Will it be the pompous Mayor, the arrogant Princess or the love-sick student?!

One star-prize winner will scoop a family ticket to see **Wilde Creatures** at the **Vaudeville Theatre** in London, plus £100 towards travel. Three runners-up will win a family ticket. Great!

**Q** Which of these was a famous Oscar Wilde book?

a) *The Picture of Taylor Swift*  
b) *The Picture of Kim Kardashian*  
c) *The Picture of Dorian Gray*

● **Wilde Creatures** is playing at the **Vaudeville Theatre** from 15-31 December 2017. Visit [Nimaxtheatres.com](http://Nimaxtheatres.com) for full information and to book your tickets.

Terms & Conditions: One reader will win a family ticket (four tickets, minimum one adult) to see **Wilde Creatures** at the Vaudeville Theatre, between 15-31 December 2017, subject to availability, plus £100 towards travel. Three runners-up will win a family ticket only. No cash alternative. Accommodation not included.

# The Racehorse Who Disappeared

Where do you hide a stolen horse? Find out in Clare Balding's galloping great new read!

Charlie Bass is a horse-mad ten-year-old. Her horse Noble Warrior won the derby and saved her family from financial ruin, but just as life is getting back to normal, Noble Warrior vanishes. The police are baffled. The clues are few. And if Charlie can't track down her beloved horse herself, she may never see him again...

Available at **TESCO** Every little helps.

## Noble match-up!

Can you work out which two of these illustrations are identical?

Answers on page 56

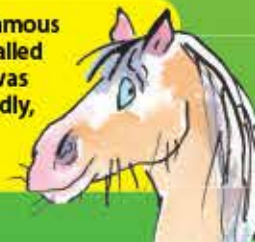

Race over to [puffin.co.uk](http://puffin.co.uk) for more great books!

## 5 fast horse facts!

Giddy up with this horse-some info...

- 1 Humans first domesticated horses about 4,000 years ago.
- 2 Horses can sleep lying down or standing up!
- 3 A foal (baby horse) can trot within hours of being born.
- 4 The world's fastest horse was a young female called Winning Brew. She could run nearly 71kmph!

5 In 1983, a famous racehorse called Shergar really was kidnapped – sadly, he was never seen again.

## Wordsearch

Can you find all of these words from *The Racehorse Who Disappeared* in this grid?

- CHARLIE ● DERBY ● FOLLY FARM ● GALLOP ● KIDNAP ● NOBLE WARRIOR ● POLICE

# BIRTHDAY BOY

What would it be like if your birthday was every day? Find out in David Baddiel's hilarious new hardback book!

This is the story of Sam Green, who really, really, really loves birthdays. He loves the special breakfasts in bed. The presents. The themed parties. Blowing out the candles on his cake. Everything. Sam's so excited about his 11th birthday, he wishes it was his birthday every day. So, at first, he's

quite excited when he wakes up the next morning to discover it really is his birthday again! And again. And again. And again... But it's not long before things start to go wrong. And soon, disaster strikes, threatening something Sam loves even more than birthdays. Sometimes you have to be careful what you wish for...

## Meet the characters!

**SAM GREEN**  
The birthday boy  
**AGE** 11 on 8 September  
**SCHOOL** Bracket Wood Primary, class 6B  
**LIVES WITH** his family on the 17th floor of a tower block

**RUBY GREEN**  
Sam's younger sister  
**AGE** 7, turns 8 on 3 June  
**SCHOOL** Bracket Wood, Year 3  
**DISTINGUISHING FEATURES** Very clever, very direct. Not very tall (can't see out of the flat's windows without a boost)

## Party puzzle!

Can you complete this wacky word sudoku so that every column, row and 3x3 box contains the letters of Sam's favourite word... BIRTHDAYS?

# Funny FILL-IN

## ALIEN INVASION

Ask a friend to give you words to fill in the blanks in this story without showing it them. Then read it out loud for a laugh!

Halloween was finally here. I dressed as \_\_\_\_\_ noun \_\_\_\_\_ man with a(n) \_\_\_\_\_ adjective \_\_\_\_\_ article of clothing \_\_\_\_\_ friend's name \_\_\_\_\_ went as \_\_\_\_\_ famous female \_\_\_\_\_, Queen of the \_\_\_\_\_ body of water \_\_\_\_\_. We met up with our friends, who were dressed as \_\_\_\_\_ mythical creature, plural \_\_\_\_\_. They had \_\_\_\_\_ noun, plural \_\_\_\_\_ on their heads and had \_\_\_\_\_ past-tense verb \_\_\_\_\_ their skin \_\_\_\_\_ colour \_\_\_\_\_. Plus, both of them had \_\_\_\_\_ large number \_\_\_\_\_ body part, plural \_\_\_\_\_ and had constructed a(n) \_\_\_\_\_ adjective \_\_\_\_\_-looking \_\_\_\_\_ type of transportation \_\_\_\_\_. " \_\_\_\_\_ nonsense word \_\_\_\_\_," the pair said – they had even made up a new language to go with their \_\_\_\_\_ noun, plural \_\_\_\_\_. Then they gave us a tour of their \_\_\_\_\_ noun \_\_\_\_\_. But when we \_\_\_\_\_ past-tense verb \_\_\_\_\_ the vehicle, we were shocked to see our friends down the street. They were dressed as \_\_\_\_\_ same mythical creature, plural \_\_\_\_\_, only with much simpler costumes. " \_\_\_\_\_ exclamation \_\_\_\_\_!" we said. Who were these creatures who'd given us the tour? We \_\_\_\_\_ adverb ending in -ly \_\_\_\_\_ looked behind us, but the creatures were gone. Suddenly something \_\_\_\_\_ past-tense verb \_\_\_\_\_ above us. Guess you could say Halloween was out of this world.

### GRAMMAR TERMS!

- Noun** – a person, place or thing
- Verb** – an action word that describes what a person or thing does
- Adjective** – a word that describes a noun
- Adverb** – a word that describes a verb

Q Did you hear about the two grumpy cacti? A They were a prickly pair! Q What do you get if you keep cows in a desert? A Evaporated milk! Q What did the woodpecker say to the cactus? A "You're lookin' sharp!"

# Fun stuff! Make it

# Yummy chocolate apples!

This chocolate-covered fruit makes a great treat for Bonfire Night and beyond!

## What you'll need

- Apples ● Bamboo sticks
- Milk chocolate ● Bowl ● Spoon
- Greaseproof paper ● Sprinkles

## Start here!

**1** First, wash and dry the apples and pull the stalks off. Then push the bamboo sticks into the bottom.

**2** Next, break the chocolate into small pieces and place it in the bowl. Melt the chocolate in the microwave for 20-30 seconds at a time, stirring it each time until it's become a smooth paste.

**3** Now, put greaseproof paper down on the table. Holding the apples by the sticks, dip them into the bowl and swirl them around to cover them in chocolate. Use a spoon to help you if needed.

**4** Let the excess chocolate drip off into the bowl, then carefully place the apples on the greaseproof paper.

**5** Finally, decorate your chocolate apples with sprinkles or finely chopped nuts, then leave to set. When they're totally dry, they're ready to munch... so tuck in!

**TOP TIP!** You could use a mix of white and milk chocolate for your apples to create a cool marble effect!

Time to get messy!

## CHILLY CHALLENGES

The days may be getting colder, but you can still have some fun outdoor adventures! Check these ones out...

### LEAF SAFARI

Grab your boots and take a trip into the woods to see how many different types of leaves you can spot. Gather them as you go and see if you can match them with the trees they've fallen from. Yay!

Head to the woods!

### Feathery fun!

### FEED THE BIRDS

A garden bird feeder is easy-peasy to make! Simply cut a bagel in half (as if you were going to stick it in a toaster), spread it with peanut butter and roll it in bird seed. Then hang it from a tree with string and wait for the birds to feast!

### GET SNAPPING!

Autumn is a great time for spotting wildlife. Why not take your camera into the woods or your garden and see what you can snap? You might see hedgehogs, bugs, birds or even badgers and foxes! Remember, to wrap up warm though!

Keep your eyes peeled!

Helps with homework! School resources for teachers now online!

NATIONAL GEOGRAPHIC Kids competitions are open to residents of the UK, Eire and the Channel Islands, except employees of Creature Media Ltd, National Geographic Society, and their families, or any associated companies. NATIONAL GEOGRAPHIC Kids will not share your personal details with third parties. Only one competition entry per person. Winners will be the first correct entries drawn after the closing dates. The editor's decision is final. Entrants to National Geographic Kids contests must be 16 or under. No purchase necessary. No responsibility can be taken for entries lost or damaged in transit. National Geographic Kids will not enter into any correspondence. Winners' names will be published at [natgeokids.com](http://natgeokids.com). Prizes subject to availability. No cash alternative for any prizes will be offered. The winner may be required to partake in media activity relating to the competition. NG KIDS may wish to contact readers in the future by post, phone or email. Please tick the box if you do NOT wish to be contacted. For details of our privacy policy, please go to [natgeokids.com](http://natgeokids.com)

KNOW!**

# 7 surprising facts about SPIDERS

**1 Golden silk orb-weaver spiders vibrate their webs to distract predators.**

**2 After a large meal, a tarantula may not eat for a month.**

**3 There are more than 40,000 species of spiders.**

**4 The oldest known spider fossils are more than 300 million years old.**

**5 A black widow spider's venom is stronger than a rattlesnake's.**

**6 A spider eats about 2,000 insects a year.**

**7 Crab spiders change colour to blend in with their surroundings.**
